Supervisor: Dr Veronique Ines Thouvenot

Background

The Foundation Millennium2025 Women and Innovation (http://www.millennia2015.org/Millennia2025_Foundation) is committed to highlight the crucial role of women in global health and telemedicine, as well as their recognized capacity as builders of alternative futures. The latter is based on women's innate future orientation, their ability as social actors to mediate and network at all levels, and to face natural catastrophes and human conflicts by saving lives and creating solidarity among women.

Acknowledging that women remain a forgotten group in many countries, Connecting Nurses (CN: <http://www.connecting-nurses.com/web/>) and the Foundation launched the Women Observatory for eHealth (WeObservatory, : <http://www.m2025-weobservatory.org/>) an innovative Digital Inclusion Platform dedicated to women's global eHealth challenges to serve as a unique Resource and Education Center to promote women's empowerment and education through the access and use of advanced technologies for health, combined with Massive Open Online Courses programs (MOOCs).

Purpose of the Internship

The intern will be working on Massive Open Online Courses (MOOCs), offered by an ever-growing number of platforms, providing anyone with an Internet connection, open access, for free, to online educational content developed by higher education institutions. To raise awareness and help women and health professionals take advantage of this valuable resource, the WeObservatory launched in 2014 its Intelligence MOOCs Commons for Women and eHealth (WeMOOCs). WeMOOCs provides access to a selection of online courses addressing the areas of Global Health, Women, and ICTs.

The WeMOOCs' goal is to facilitate the access of women around the globe to online education in the areas of global health, nursing, patients, women, and Information and Communication Technologies (ICTs).

Duties / Responsibilities

The Intern will establish a list of MOOCs, in English, and French and Spanish, if possible.

Activities will include:

1. Scanning of online courses offerings on nursing care from the largest and most widely recognized MOOC platforms
2. Selection of MOOCs courses based on the criteria established by the WeObservatory
3. Share and discuss the results
4. Update the list of MOOCs for previously selected courses and add new courses that fit the selection criteria

Deliverables & Expected results

1. Draft list of MOOC platforms offering courses
2. Draft list of MOOCs
3. Final list of MOOCs

Qualifications/Experience:

- Interest and experience on eLearning, online education, use of Information and Communication Technologies (ICTs), Social Media.
- Sound understanding of MOOCs
- Excellent communication skills and ability to manage activities with the WeObservatory
- Good editing skills and ability to use Excel and Word.

Languages: Excellent knowledge of English is required. French and Spanish are appreciated.
